

See your enterprise through the eyes of an attacker

More than a concept – a Proof of Value

Test drive the benefits of a NodeZero subscription with a free trial that shows you Proof of Value (POV).

Painless

NodeZero is an unauthenticated run-once container you deploy yourself. No persistent agents. No provisioned credentials. Up and running in minutes. Results within hours. With NodeZero you own your pentest from start to finish.

Safe

You configure the scope and attack parameters. NodeZero conducts benign exploitation, gathers proof, and delivers a complete report, so you can focus on your real risks and maximize your remediation efforts.

Continuous

Catch up. Keep up. Stay ahead. Run NodeZero continuously and evaluate your security posture over time. Proactively identify and remediate attack vectors as they appear.

Why NodeZero

- ✓ Identify internal attack vectors that lead to sensitive data exposure, critical systems disruption, Ransomware risk, and other critical impacts
- ✓ Identify external attack vectors that enable attackers to defeat your perimeter security
- ✓ Verify the effectiveness of your security tools, processes, and controls
- ✓ Prioritize your vulnerabilities and fix actions based on risk and effort
- ✓ Verify that your security fixes have actually remediated the problem
- ✓ Report your current security posture, and how it has improved over time, to your board and regulator

Kick off a POV & learn how companies are taking an agile & proactive security stance.
